

FCC:

I benefit from listening to XM Satellite Radio and its traffic and weather channels. I frequently travel across the US by car for my job. I have come to depend on the instant local traffic and weather as well as enjoy the ability to listen to my same favorite channels from coast to coast. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.
